

A DANGEROUS MIX

Many fire deaths are caused by people attempting to cook or smoke while under the influence of alcohol.

The Facts About Alcohol and Fire

There's more to responsible drinking than taking a cab.

Don't put yourself—or your family—at risk of fire.

Click on www.ofm.gov.on.ca for more fire safety information.

Key Messages:

- ✓ Alcohol and fire are a dangerous mix.
- ✓ Keep a close eye on any drinkers in your household and make sure all cigarettes are properly extinguished and the stove is off before going to bed.
- ✓ Cigarettes can smoulder among upholstery cushions for hours before igniting. Check sofas and chairs for cigarettes that may have fallen between the cushions.
- ✓ Install smoke alarms on every storey and outside sleeping areas. If occupants smoke in the bedrooms, install smoke alarms inside the bedrooms as well.
- ✓ Test smoke alarms every month and replace the batteries at least once per year.
